Dear Dr. Sparti:

I very much appreciate your letter of April 10th and your kind remarks concerning my brother.

It was very considerate of you to write and you can be sure that your suggestions, as well as those of many other thoughtful persons like yourself, are being given careful attention and consideration by the physicians in charge of my brother's care.

With best wishes.

Sincerely,

SIGNED

April 18, 1959

Dr. Allen W. Dulles  
Central Intelligence Agency  
Washington 25, D.C.

Dear Dr. Dulles:

In January of this year I met with Sen. Herman Talmadge to discuss a form of medical treatment which I am using successfully to control the spread of malignancies. I was referred to the National Cancer Institute but being unable to obtain satisfactory audience, it became necessary for me to postpone the matter for a later date.

My treatment stops mitosis of cells and as you know malignancies are identified by the mitotic figures on slides. The normal cell is not killed because of the malignancy but because of the rapid growth of the malignant cells which in a way smother the normal cells by pressure. The treatment consists of medications that have been proven and work for other diseases.

I called Washington yesterday and Mr. Turner and Miss Braswell secretaries to Senator Talmadge suggested that I write to you personally.

My treatment is not a cure but it does stop the disease from getting worse. I feel that I have part of the answer to an ultimate cure of cancer.

Sincerely,

*Frank J. Sparti*
